New Package Sizes – Now Available

0.1mg Sizes for Key Metabolite Standards

Cambridge Isotope Laboratories, Inc. is pleased to now provide smaller package sizes (0.1 mg) for top metabolite standards.

These stable isotope-labeled compounds cover a range of classes (e.g. fatty acid and lipids, sugar and sugar phosphates, and organic acids). The new sizes should provide flexibility and ease of use for MS-based metabolomics studies.

Build your own custom kit! Pick and choose from these metabolite standards – *the more you buy, the more you save.*
